42Q

What's New In 15.68

MESWeb

- Wildcards to include date/time in scheduled report name

Production Scheduling

- Display % of completion for each sub schedule
- Target and Cycle Time information
- Add part family filter
- Get the actual process

Statistical Process Control (SPC)

- PCB Support
- Feature Name Improvement

Auto Route

Command Register

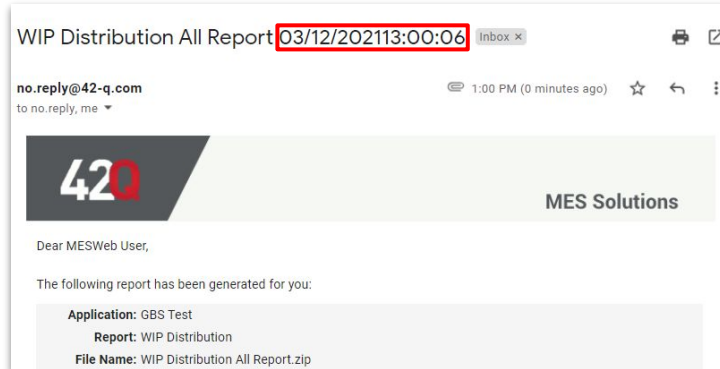

- Import/Export Configuration

OEE

- View Utilization value in charts and dashboards

Wildcards: <%DD%> <%MM%> <%YYYY%> <%hh%>
<%mm%> <%ss%> <%date%> <%time%>

The screenshot shows the '42Q MESWeb GBS Test' email configuration window. The 'Via' dropdown is set to 'By email'. The 'File Name' field contains 'WIP Distribution All Report'. The 'Format' dropdown is set to 'Excel'. The 'Zip format' and 'Send me a copy' options are both checked. The 'Attachment limit size' is set to 18. The 'To:' field contains 'bobby.hanna@42-q.com'. The 'Subject:' field contains 'WIP Distribution All Report <%date%><%time%>', with the wildcard placeholders highlighted in red. The window title bar shows 'BOBBY HANNA'.

In MESWeb you can now include the Date/Time in Email Subject or Attachment filename using Wildcards.

In Production Scheduling you can now display the % of completion of each subschedule.

Example: 50.00% 1/2/50

50% Complete | 1 unit(s) complete/2 units on schedule/50 units on Shop Order
